

ENZYMATIC LIQUID DRAIN LINE TREATMENT

- Powerful enzymatic formula
- Keeps drains flowing freely
- Eliminates foul and musty odors
- Ideal for A/C condensate pans and drains
- Perfect for food service and kitchen drains
- Easy pour top for any application
- Breaks down fats, oils, and greases
- Safe for systems and non-corrosive

Description

PowerZyme™ liquid, an enzyme-based drain line treatment is designed for use in the HVAC and food service market. PowerZyme liquid is a quick and easy solution to address condensate and drain line problems such as odors, grease, sugar snakes, and more. PowerZyme liquid is easily dispensed from the quick flip top spout, to address a variety of applications. Designed to keep drains from fouling from sludge organic matter, and quickly reduce and eliminate odors. When used as directed, it will resist future build-up for up to 3 months. PowerZyme liquid is heavier than water so will easily pour through standing water.

Applications

PowerZyme is available in a 32oz or 8oz ready-to-use package size. PowerZyme is easy to use and can be poured directly from the easy flip top spout. Dispense PowerZyme into the condensate pan or directly into a drain line to ensure proper coverage and treatment. PowerZyme utilizes safe enzymes and bacteria cultures to address drain issues such as slow moving lines, clogs, odors, and more. PowerZyme will coat the condensate pan or drain lines to provide up to 3 months of protection.

Directions for use

This product must be used in accordance to the following directions by HVACR professionals only.

HVAC SERVICE:

A/C Condensate Pans & Drains

1. Turn off power to the air conditioner.

Indoor Air Quality Products

PowerZyme™

2. If necessary clear the clogged condensate drain line using the Nu-Calgon Gallo Gun™ 4179-01.
3. Open easy pour flip top and pour 8 fl oz of PowerZyme liquid into drain pan, drain line or condensate pump inlet. 8 fl oz of PowerZyme liquid will treat up to a 4 ton system.
4. Repeat for proper treatment every three months. PowerZyme provides residual prevention from build-up for up to three months.

FOOD SERVICE:

Soda Fountain Drains, Bar Top Drains, Kitchen Drains, and Ice Machine Drains

1. For initial use, pour 8 fl oz of PowerZyme liquid directly into drain. Repeat this step daily for 5 to 7 days.
2. After 5 to 7 days of treatment, maintain the drain line by pouring 4 fl oz in the drain line once per week.

*Not for use on food contact surfaces.

Packaging

1 Quart **4298-22**

1 8oz Bottle **4298-21**
