# Single Packaged 14 SEER Heat Pump System

## HORIZONTAL PACKAGED HEAT PUMPS

Trane 4WHC4 packaged heat pumps are designed for efficiency, reliability and easy installation.

Reliable electronic Demand Defrost, rugged compressor, filter drier and thermal expansion devices are the backbone of the Trane heat pump. We have also made installation easier and less costly by standardizing the cabinet and accessories. One standardized cabinet design for the 2-3-1/2 ton models.

**Single Packaged Electric Heat Pumps are easy and versatile to install.** These heat pump units have an over/under horizontal configuration which provides an efficient airflow delivery. This dedicated design eliminates the need for any unit conversion, saving field labor and installed cost.

**Better Installability** With standardized cabinet designs, all components were designed to be located in the same location, regardless of unit size.

**Better Serviceability** Our single packaged cooling/heating units offer efficiencies that are unmatched in the industry and provide you with a product far superior in performance than the competition.

With standardized cabinet designs, all components were designed to be located in the same location, regardless of unit size.

A simplified control panel that features colored and numbered wire is standard on all products. This aids in reducing troubleshooting time when wire tracing is required. And easy access to all major components can be accomplished by removing quick service access panels.

**Unmatched quality and reliability.** All major components on these products, including the compressor, have been designed and manufactured for maximum service. Every Climatuff™ compressor is designed and manufactured to exacting specifications. Each design is life tested in extreme environments to ensure reliable and long lasting operation in normal applications. Each compressor has internal motor protection for added reliability.

## Design Features

- Climatuff™ compressor, designed and manufactured to provide reliable, economical operation
- Internal pressure relief and internal overload protection
- High Efficiency multi-speed direct drive indoor fan motor. Variable speed direct drive blower motor on 4WHC4042 models.
- Thermal expansion valve refrigerant control.
- Demand defrost control system.
- Reliable, solenoid-operated reversing valve.
- Copper tube, aluminum plate fin coils.
- Polarized plug for easy field connection of low voltage to supplementary heater.
- Duct flanges.
- Outdoor coil guard.

## Accessories

- Supplemental Electric Heaters
- Thermostats
- Low ambient cooling to 0°F.

**Notes:**

1. All power supplies and circuits must be wired and protected in accordance with local electrical codes.

(a) The MCA values listed are for electric heater only.

(b) Field wire must be rated at least 75°C

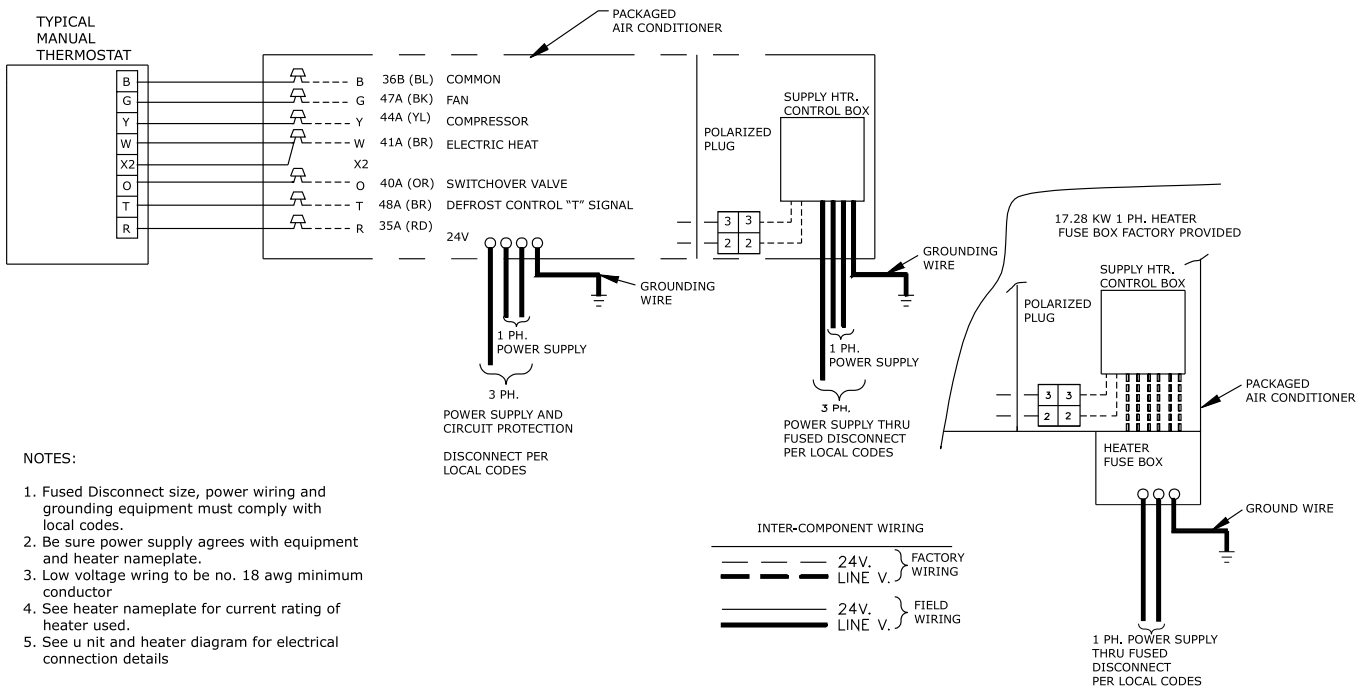

(c) The HACR circuit breaker is for U.S.A. installations only.

(d) For Canada installation reference only.

(e) Heater uses fuses.

# Mechanical Specifications

## General

All units are factory assembled, piped, internally wired and fully charged with R-410A. Units are certified to UL Standard 1995. All units are factory run-tested to check cooling and heating operation, defrost operation, fan and blower rotation and control sequence. Units shall be designed to operate at ambient temperatures as high as 115°F. Cooling and heating performances are rated in accordance with AHRI standards. Units are designed for either rooftop or ground level installation. All units shall be dedicated horizontal airflow and are not convertible.

## Unit Casing

All components are mounted in a weather-resistant steel cabinet with a baked-on enamel finish. Access panels are provided for unit controls, indoor coil and supply air fan. Top covers shall be removable for access or installation of electric heaters and outdoor fan and compressor. Indoor air section is completely insulated with fireproof, permanent, odorless glass fiber material. Knockouts are provided for utility and control connections. Drain connections are provided to accommodate indoor coil water runoff.

## Compressor

Hermetically sealed, high efficiency Climatuff™ compressor designed for heat pump duty. Internal over current and over temperature protection, low pressure protection.

## Refrigerant Circuit

All units have thermostatic expansion valve refrigerant control for heating and cooling operation. Service pressure tap ports, check valves, solenoid-operated reversing valve, and refrigerant line filter driers are standard.

## Indoor and Outdoor Coil

Indoor and outdoor coils are constructed of aluminum plate fins mechanically bonded to 0.375 inch seamless copper tubing.

## Outdoor Fan

One, direct-drive, statically and dynamically balanced propeller fan is used in a top discharge configuration. Permanently lubricated weatherproof motors have built-in thermal overload protection.

## Indoor Fan

Forward-curved, centrifugal-type fan with multispeed, Direct-drive Constant Torque Motor on 2 – 3 ton models and a Direct-drive Variable Speed Motor on 3 1/2 ton models. Permanently lubricated with built-in overload protection.

## Demand Defrost Control

Microcomputer logic is used to sense the need for defrost and permits defrost cycles only when coil icing conditions begin to cause serious heat pump capacity reductions.

## Accessories

Supplemental Electric Heater-Heater module shall mount in unit discharge air passage. Each heater assembly includes automatically resetting heat limit switches for thermal protection. A polarized plug provides connection to unit low voltage control wiring.

## Indoor Thermostat

Two-stage heating, one-stage cooling thermostat is available in either manual or automatic changeover. Thermostat provides automatic or continuous fan operation and includes outdoor thermistor, emergency heat switch with indicator light, and auxiliary heat indicator light.

## Low Ambient Control Kit

Provides low ambient cooling operation to 0°F

Ingersoll Rand (NYSE: IR) advances the quality of life by creating comfortable, sustainable and efficient environments. Our people and our family of brands — including Club Car®, Ingersoll Rand®, Thermo King® and Trane® — work together to enhance the quality and comfort of air in homes and buildings; transport and protect food and perishables; and increase industrial productivity and efficiency. We are a global business committed to a world of sustainable progress and enduring results.
