

# Universal self flare fittings for copper and aluminium tubes

## EBRILSMART technical characteristics

- ✓ Working temperature: -45°C to 150°C
- ✓ Maximum operating pressure: 45 bar
- ✓ Suitable for all refrigerants HCFC, HFC, HC
- ✓ Triple metallic seal
- ✓ Compatible with traditional 45° flare fittings
- ✓ It is not required the use of a torque wrench for the installation
- ✓ To be used exclusively on R220 annealed copper tubes and OH111 aluminium tubes

## EBRILSMART certification

- ✓ Conformity with European Directives (PED, RoHS and REACH)
- ✓ Superior performance than the traditional 45° flare fittings

***Ebrilsmart***

## Installation

Insert the tube, previously cut and deburred, into the nut and then insert the sleeve

Hand tighten the nut to the joint

Mark the starting point and make a complete turn and a half with the aid of a common wrench
