"Solving Today's HVAC Problems"

FLOOD PREVENTION SWITCHES

- ★ Easy to Install and Access
- ★ Auto System Shut-off
- ★ Reliable Flood Damage Prevention

Flood Prevention Switches from Airstar prevent water overflow.

When the water level in the system's auxilliary or main drain pipe rises caused by a clogged A/C condensate drain, this switch shuts off the system.

Features include:

- Low Voltage Switch
- "No-stick" Float Design
- All installation components supplied for flexible install connections
- 1" and ¾" ports accept standard Schedule 40 PVC pipe, plug or bushings
- Simple switch access [automatic reset]
- UL508, NEC and IMC compliant

Call or email Airstar for pricing.

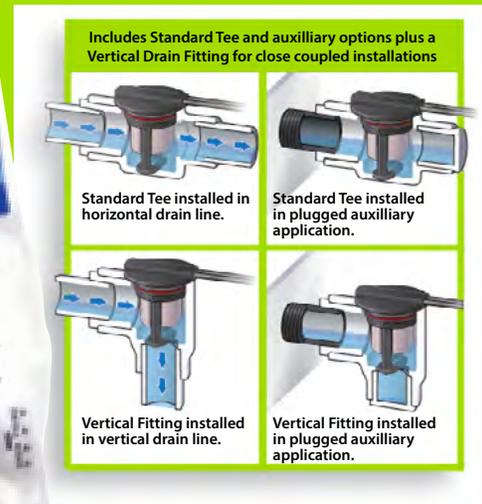

FLOOD PREVENTION SWITCHES

"Do-It-All" Tee Model FPS-T

Commercial/Residential installation to primary condensate drains, vertical and horizontal, including a close coupled plugged or vertical drain option.
