

Airstar Supply

A Division of Airstar Solutions, Inc.

"Solutions for Today's HVAC Problems"

QUICKLY AND EFFICIENTLY REDUCE MICROBES AND ELIMINATE ODORS IN RESIDENCES, HOTELS, OFFICES, YACHTS/BOATS, SCHOOLS, RESTAURANTS

with an **RGF** ENVIRONMENTAL

RAPID RECOVERY UNIT

Air Purification and Odor Destruction

*Advanced Oxidation Generator featuring RGF PHI*Technology*

Air treatment benefits include:

- Elimination of odors
- Prevention of mold growth
- Suppression of bacterial growth
- Reduction of particulates (smoke, etc.)

DESTROYS

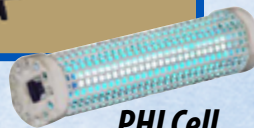

- Tobacco Odors • Mold and Mildew
- Pet Odors • Chemical Fumes
- Cooking Odors • Paint Odors
- Volatile Organic Compounds (VOCs)

***Photohydroionization™ Cell Module**
An advanced oxidation reaction occurs when light energy from the *ultraviolet (UV) cell* reacts with the air, and a hydrated *quad-metallic catalyst*. This reaction creates cleansing ions, such as hydroperoxides and super oxide ions, which are exhausted from the system into the surrounding air.

The Rapid Recovery Air Purification unit can easily be placed into a return vent and used to reduce mold, microbes, and gases. Once the unit is activated, it will quickly and efficiently clean your duct work.

Odor Absorbing Media Filter
