Dehumidifiers (GFI #5133 & 5134)

Breathe Healthier

Control Indoor Humidity.

Installing a HealthyAire[®] Whole House Dehumidifier can reduce mold and mildew, abate insects, lower summer energy bills, and eliminate dust mites. Breathe healthier, drier air.

Install a dehumidifier in your home to:

Protect your family's health:

Long-term exposure to mold and mildew can become a serious health problem. Reduce moisture to reduce the occurrence of mold and mildew. Drier air can help to control insects that are drawn to moisture, reduce dust mites and alleviate causes of allergy and asthma symptoms.

How the DH70 & DH95 Works:

As a fan inside pulls air through the DH70 & DH95 (and the MERV 11 pleated filter inside), moisture and harmful particulates are removed to provide drier, healthier, more comfortable air to you and your family.

Details inside or go to: www.generalfilters.com/dehumidifiers

Save Money on Energy Bills:

Moist air can feel heavy and hot. Drier air feels cooler. Reduce moisture, feel more comfortable and turn down the air conditioner during summer months.

Clean up Water Damage:

A dehumidifier can be a valuable part of a comprehensive water damage cleanup plan.

Why Whole-House Dehumidification Vs Portable Room Units?

See the top reasons below why a whole-house dehumidifier is a better option for your home than a portable room unit:

	GeneralAire [®] Whole House Dehumidifier	Portable Dehumidifier Units
Controls humidity in every room of your house	Yes. You will benefit from proper humidification throughout your home.	No. You'll need to purchase a unit for every room in your house.
Quiet Operation	Yes. Your system will be so quiet you'll forget it's there.	No. Portable units are noisy and take up space in your rooms.
Minimal Maintenance	Yes. Maintenance is only once every 6 months	No. You'll constantly be emptying and cleaning heavy water pans.

Selecting a Dehumidifier

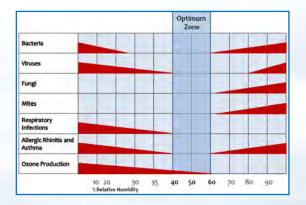

There are several considerations when selecting a humidifier for your home:

- 1. Do you live in a humid climate?
- 2. Have you experienced physical discomfort during humid times of the year?
- Have you recently experienced water damage? (Dehumidifiers can be part of a comprehensive water damage cleanup plan.)
- 4. Do you have a health condition that is aggravated by mold or dust mites? Lower humidity levels can greatly reduce mold and dust mites in your home.
- Do you feel as if you have an excess bug population? Dehumidifiers create a less hospitable climate for many bugs, including spiders, silver-fish and centipedes.
- 6. Do you find condensation on your water pipes?
- 7. Do you often find a musty smell in your home?

We recommend speaking with a licensed contractor for assistance with your dehumidifier selection and installation. Use our "Find a Contractor" tool on www. generalfilters.com for a list of contractors in your area.

Ideal Humidity Levels

Research has shown that 40% to 60% relative humidity provides a comfortable environment for your woodwork, your furniture, your plants, your pets and especially you and your family.

Protect your family and your valuables. Install a GeneralAire[®] Model Dehumidifier today.
